PROFESSIONAL SUMMARY

Dean's List Computer Science graduate with a **3.67 CGPA**, anchoring robust academic foundations in **artificial intelligence and database systems**. Professional track record features an **89.57% KPI** and **100% on-time** UAT delivery for enterprise platforms serving **27 million users**. Highly adaptable technical mindset equipped to excel across **Software Developer, Application Support, Junior System Analyst, or QA Tester** roles.

KEY ACHIEVEMENTS

- Maintained Dean's List throughout the degree programme with a 3.67/4.00 CGPA.
- Independently designed and built a full relational database system (ERD, 3NF normalization, SQL queries, forms, and reports) in Microsoft Access for a database design course.
- Achieved an 89.57% overall performance score in Q1 2026, excelling in individual KPI execution (28.50/30) and collaborative competency benchmarks.
- Contributed to the feature deployment of the national SPAN Mobile Application, supporting a massive system architecture built for 27 million users.
- Delivered core functional modules for the Kampung Digital Melaka 2.0 platform, successfully passing 100% of User Acceptance Testing (UAT) on time.

SKILLS

Languages & Core Development: C# | .NET Foundations | JavaScript | Java | PHP | Dart

Microsoft Ecosystem: Microsoft Teams (meetings, scheduling, communications) | SharePoint (document collaboration) | Excel, Word, PowerPoint (reporting & documentation) | Visio (process/flowchart diagramming) | Access

Backend & APIs: RESTful APIs (Axios) | MySQL | Laravel

Frontend & Mobile Development: Vue.js | Flutter | Figma (UI Prototyping) | Responsive & Cross-Platform Development

Product Delivery & Testing: UAT | FAT | SDLC (Agile/Scrum) | Git/GitHub

Systems & Documentation: User Requirements Gathering | Process Mapping | Rapid Application Development (RAD)

Other: AWS (Foundational) | OOP/OOD Fundamentals

EXPERIENCE

Junior Executive Application Developer

Jan 2026 – Present

MAP2U Sdn Bhd | Contract | Nilai, Negeri Sembilan

- Engineered end-to-end features for two large-scale government digital platforms (KDM 2.0 and SPAN) using Vue.js and Flutter, managing full-stack delivery from UI components to RESTful API integrations via Axios.
- Transformed complex Figma wireframes into high-performance, production-ready code, boosting frontend development velocity by 20% while maintaining strict design fidelity.
- Represented the developer perspective in UAT and FAT review sessions, ensuring delivered modules met rigorous government compliance to secure a 98% first-pass sign-off rate.
- Leveraged AI-assisted development tools (Claude, GitHub Copilot) alongside strict Git version control to cut debugging cycles by 30% and sustain a highly stable, clean-code architecture.

Intern System Developer

Sep 2025 – Dec 2025

MAP2U Sdn Bhd | Nilai, Negeri Sembilan

- Co-developed and optimized user-facing components for the KDM 2.0 platform within an Agile/Scrum team, improving interface responsiveness by 15% and elevating the overall user experience.
- Executed end-to-end quality assurance workflows and resolved critical bugs for high-security government web applications, reducing post-release defects by 25% and ensuring seamless deployment.

PROJECTS

SPAN Mobile Application System *(In Progress)*

- Co-developing a cross-platform mobile app using Flutter to serve an estimated 27 million users across Malaysia.
- Designed responsive user interfaces and built organized code structures to manage application data smoothly.
- Collaborated with a fast-paced Agile team to launch continuous feature updates and system integrations.

Kampung Digital Melaka 2.0 System

- Built web interfaces for a state platform that manages property records for 1.05 million residents.
- Integrated RESTful APIs using Axios to create clean data connections between the Vue.js frontend and Laravel backend.
- Created interactive tables with search, sorting, and pagination to help administrators view and filter data easily.
- Independently designed a complaint tracking module with real-time status updates that passed client testing UAT and FAT.

Augmented Reality Mobile Application *(Final Year Project)*

- Designed and developed an Android-based markerless AR application in C# with Unity, managing the full SDLC from requirements analysis to deployment.
- Applied OOD principles to model system architecture and utilized OOP concepts (Inheritance, Encapsulation) in C# to manage state, physics, and real-time positioning of 3D virtual objects.
- Self-taught Unity and 3D modelling within a strict timeline, demonstrating rapid technical adaptability to deliver a fully functional mobile product.

Database Design & Development: Coffee Shop Management System *(Academic Project)*

- Independently designed and built a complete relational database system using Microsoft Access.
- Created Entity Relationship Diagrams (ERDs) and normalized data (1NF to 3NF) to eliminate data errors and duplication.
- Built the full data layer (Staff, Order, OrderCoffee, Coffee tables) with defined primary/foreign key constraints and a data dictionary.
- Wrote and tested over 10 SQL queries, using table joins and calculations to generate business reports like sales overviews.

CampusCruise: Campus Ridesharing & E-Hailing System *(Academic Project)*

- Led as Project Manager, overseeing stakeholder communication, task delegation, and full project documentation lifecycle.
- Conducted live user requirement gathering and stakeholder interviews to validate system needs.
- Produced RAD documentation, flowcharts, and Figma prototypes that secured formal stakeholder sign-off and achieved the highest mark in the cohort.

Movie Ticketing System *(Academic Project)*

- Designed a responsive user interface with an interactive seat selection layout using HTML5, CSS/Bootstrap, and JavaScript.
- Used Git and GitHub to manage code changes and integrate features smoothly with team members.

EDUCATION

Bachelor of Science Computer (Honours) in Netcentric Computing

Oct 2022 – Dec 2025

Universiti Teknologi Mara (UiTM) | Shah Alam, Malaysia | GPA: 3.67/4.0 | Dean's List

Relevant Coursework: Database Design and Development, Object-Oriented Programming, Web & Mobile Application Development, Mobile Cloud Computing, Cybersecurity, Fundamentals of AI

CERTIFICATIONS

- AWS Bootcamp — Iverson Workshop
- Cisco Introduction to IoT — Cisco Networking Academy
- Google Cybersecurity Professional Certificate — Coursera
- Girl CTF — Cybersecurity Competition Participant

LANGUAGES

- Malay: Native
- English: Advanced
