PROFESSIONAL SUMMARY

Fresh Computer Science graduate and Junior Application Developer with frontend experience in Vue.js and Flutter/Dart across two national government platforms. Grounded in systems analysis and documentation, with hands-on troubleshooting experience using Postman and browser developer tools. Brings a foundation in SQL and relational databases through academic project work.

KEY ACHIEVEMENTS

- Triaged and validated confirmed API vulnerabilities identified in a formal security audit on a national platform, using Postman and browser developer tools for root-cause diagnosis, within the first six months in the role.
- Supported a 30% reduction in issue resolution time through structured tracking and follow-up in ClickUp, a confirmed KPI target for Q1 to Q2 2026.
- Resolved 15+ functional and UI issues during internal testing and UAT/FAT phases across two national government platforms.
- Contributed across two frontend stacks (Vue.js, Flutter/Dart) on two national government platforms serving an estimated combined 28 million users.
- Maintained a 3.67/4.00 CGPA with Dean's List honours and a performance score above 85% in Q1 and Q2 2026.

EXPERIENCE

Junior Executive Application Developer (Protégé)

Jan 2026 – Present

MAP2U Sdn Bhd | Nilai, Negeri Sembilan

- Contributed to frontend development for web and mobile systems from Figma designs for two national government platforms, serving an estimated 1.05 million residents and 27 million users respectively.
- Resolved 15+ functional and UI issues during internal testing and UAT/FAT phases, supporting on-time delivery.
- Collaborated within a cross-functional team of 10+ members, including System Analysts, developers, and project management.
- Attended 5+ client-facing UAT/FAT sessions and 5+ internal team meetings to test system flow and performance ahead of go-live.
- Triaged and validated confirmed API vulnerabilities identified in a formal security audit, using Postman and browser developer tools to trace root causes; implemented approved fixes after lead review.
- Followed a structured Git and GitHub workflow, submitting change requests for lead developer review before production merge.
- Used ClickUp for issue tracking and follow up, supporting a 30% reduction in issue resolution time.
- Proposed and applied modern UI/UX enhancements, including translucent glass style elements with gradient colour schemes, to elevate the app's premium feel.

Intern System Developer

Sep 2025 – Dec 2025

MAP2U Sdn Bhd | Nilai, Negeri Sembilan

- Developed Vue.js UI components from Figma designs across multiple modules and submodules of national government platforms under the guidance of a senior developer.
- Contributed to Agile project coordination through internal meetings, task discussions, progress updates, and collaboration with technical and business team members.
- Assisted with QA and defect-tracking activities by documenting system anomalies and supporting verification efforts ahead of release.
- Learned and applied a structured Git/GitHub workflow as part of onboarding, submitting pull requests for senior developer review before integration.

PERSONAL AND UNIVERSITY PROJECTS [URL]

Database Design & Development: Coffee Shop Management System | Microsoft Access, SQL

- Led a student team as Project Manager, dividing RAD documentation sections and coordinating stakeholder communication.
- Represented the team in stakeholder requirements interview with the Head of Department, Entrepreneurship and Human Capital Development, MASMED UiTM.
- Secured formal stakeholder sign off and achieved the cohort's top mark.

CampusCruise: E-Hailing Rapid Application Development | RAD Documentation

- Led a student team as Project Manager, dividing RAD documentation sections and coordinating stakeholder communication.
- Represented the team in stakeholder requirements interview with the Head of Department, MASMED UiTM.
- Secured formal stakeholder sign off and achieved the cohort's top mark.

ICT Procurement and Tender Evaluation

- Served as Project Manager to deliver an ICT tender proposal in response to a publicly posted ePerolehan tender specification.
- Delegated sections across the team by strength, then reviewed each section against the published specification before submission.

Augmented Reality Mobile Application (Final Year Project, Individual Coursework) | C#, Unity

- Developed an Android AR application to help novice drivers learn traffic rules, managing the full lifecycle from requirements gathering to deployment.
- Applied Object-Oriented Programming concepts to manage real-time positioning and 3D object states.
- Navigated a mid-project AR SDK migration under significant time pressure, self-teaching new engine mechanics and 3D modelling.

EDUCATION

Bachelor of Science Computer (Honours) in Netcentric Computing

Oct 2022 – Feb 2026

Universiti Teknologi Mara (UiTM) | Shah Alam, Malaysia | CGPA: 3.67/4.0 | Dean's List

Relevant Coursework: Principles of Networking, Network Programming, Database Design & Development, Web Application Security, Mobile Cloud Computing

ADDITIONAL

Technical Skills:

- Systems & Support: Root Cause Diagnosis, API/Application Issue Triage, Postman, Browser Developer Tools, Issue Tracking (ClickUp), Requirements Gathering, RAD Documentation, UAT/FAT Testing, SDLC (Agile/Scrum)
- Networking: Network Fundamentals & Protocols, Network Programming (coursework)
- Data & Databases: SQL (MySQL, MS Access), Data Modeling (ERD, 3NF), Excel, Tableau, BigQuery
- Development: JavaScript, Vue.js, Flutter, Dart, RESTful API Consumption (Axios), Java, PHP, Figma
- Security: API Vulnerability Triage & Remediation, VAPT Findings Review, OWASP Top 10/CWE Top 25, SQLMap, OWASP ZAP
