

HUMAIRAH RAMLI

Application Developer | Front-End Development | Mobile Development

+60 11-5446 4659 | humairahramli30@gmail.com | linkedin.com/in/humairah-ramli-b73624335 | Selangor, Malaysia

PROFESSIONAL SUMMARY

Frontend-Focused Application Developer with hands-on experience building scalable web and mobile applications for government-level projects. Proficient in Vue.js and Flutter, with strong foundations in REST API integration, responsive UI/UX design, and agile development practices. Contributed to successful UAT acceptance on Kampung Digital Melaka 2.0 and SPAN Mobile Application. Seeking to grow as a Frontend Developer while expanding expertise into fullstack and mobile development.

KEY ACHIEVEMENTS

- Contributed to frontend development of Kampung Digital Melaka 2.0, a state-wide government digitalization system targeting residents across Melaka — progressing from development to FAT stage within 9 months and on track for live deployment by July 2026.
- Actively developing SPAN Mobile Application for Malaysia's national water supply regulatory body (SPAN), supporting service coverage across 11 states and 2 Federal Territories with an estimated reach of over 27 million users.
- Utilized AI-assisted debugging tools to identify and resolve code errors prior to commit and maintained pull request discipline with senior lead review before merging.
- Graduated with Dean's List recognition and GPA 3.67/4.0 in Bachelor of Science (Hons) Netcentric Computing, demonstrating consistent academic performance throughout the programme.

EXPERIENCE

Junior Executive Application Developer

January 2026 – Present

MAP2U Sdn Bhd | Nilai, Negeri Sembilan

- Developed and maintained frontend and backend features for government web and mobile applications, ensuring system reliability and performance.
- Integrated RESTful APIs and optimized database queries to improve data processing efficiency across multiple modules.
- Collaborated in an agile team using Git on GitHub, contributing to code reviews and version control best practices.
- Participated in testing, debugging, and system integration, ensuring smooth deployment and minimal production issues.
- Supported full software development lifecycle from requirement analysis to deployment.

Intern System Developer

September 2025 – December 2025

MAP2U Sdn Bhd | Nilai, Negeri Sembilan

- Assisted in frontend and backend development of government web applications.
- Supported frontend and backend development using Laravel and JavaScript.
- Contributed to UI implementation and database-related functionalities.
- Worked closely with senior developers in system testing and enhancement tasks.

PROJECTS

Kampung Digital Melaka 2.0 System

- Developed and maintained a responsive property and premise management system for a government digitalization initiative.
- Integrated RESTful APIs using Axios, enabling seamless data flow between frontend and backend systems.
- Engineered advanced data tables with sorting, filtering, and pagination, improving data accessibility and user efficiency.
- Implemented role-based access control (RBAC), enhancing system security and user-specific functionality.
- Built dynamic forms and search features to streamline data entry and retrieval processes.
- Independently developed a self-service complaint tracking module, implementing input validation for reference numbers and a dynamic UI to display real-time status updates and admin remarks.
- Integrated responsive image handling features, allowing users to maximize and minimize images via pinch-to-zoom and lightbox overlays to improve media viewing UX.
- Refactored legacy code using DRY principles, consolidating duplicate files and creating reusable components across multiple pages to improve codebase maintainability.
- Contributed to modules that successfully passed User Acceptance Testing (UAT) within project timelines.

SPAN Mobile Application System *(In Progress)*

- Developing a cross-platform mobile application for Malaysia's water supply and sewerage data management system.
- Designing and implementing responsive, user-centric UI using Flutter and Material Design principles.
- Integrating RESTful APIs for real-time data synchronization, ensuring up-to-date system information.
- Building reusable widgets and scalable state management structure for maintainable code architecture.
- Implementing multi-screen navigation and dynamic data filtering, improving user interaction and usability.
- Collaborating in an agile development environment, contributing to ongoing feature development and system enhancements.

EDUCATION

Bachelor of Science Computer (Honours) in Netcentric Computing *October 2022 – February 2026*

Universiti Teknologi Mara (UiTM) | Shah Alam, Malaysia | GPA: 3.67 / 4.0 | Dean's List

SKILLS

HTML | CSS | JavaScript | Dart | Flutter | Vue.js | Vuetify | Tailwind CSS | Figma | PHP | Laravel | MySQL | GitHub | Agile | REST API

CERTIFICATIONS

- Cisco Introduction to IoT — Cisco Networking Academy
- Google Cybersecurity Professional Certificate — Coursera
- AWS Bootcamp — Iverson Workshop
- Girl CTF — Cybersecurity Competition Participant

LANGUAGES

- Malay — Native
- English — Advanced
